SUMMARY

Computer Science graduate with hands-on experience building secure, scalable software and cloud infrastructure. Proficient in Python, JavaScript, C++, and AWS, with a strong foundation in REST APIs, database optimization, and Agile workflows.

WORK EXPERIENCE

DevOps Engineer Intern

May 2026 – August 2026

SkyIT Services · Remote

- Automating CI/CD pipelines using GitHub Actions and Docker, reducing manual deployment effort and accelerating release cycles.
- Using Terraform to build and deploy servers, enabling repeatable, version-controlled infrastructure provisioning across environments.
- Managing scalable cloud infrastructure, ensuring high availability and cost efficiency.
- Monitoring system performance, diagnosing and resolving incidents through root cause analysis, and documenting infrastructure runbooks for the team.

Store Associate

Aug 2021 – May 2022

Family Liquor Store

- Assisted customers with product selection and inquiries, delivering friendly and efficient service.
- Restocked shelves and organized inventory to maintain a clean, well-stocked sales floor.
- Operated cash registers and managed transactions accurately, handling cash and card payments.

PROJECTS

Serverless AWS Portfolio ([My Portfolio](#))

Oct 2026

Cloud Architecture – AWS (S3, CloudFront, Lambda, API Gateway, DynamoDB)

- Deployed a static portfolio site on Amazon S3, served globally through CloudFront with enforced HTTPS, and restricted the bucket with Origin Access Control so direct S3 URLs return 403
- Built a serverless visitor-counter API with API Gateway (HTTP API), Lambda (Python/boto3), and DynamoDB, using an atomic update so concurrent visits aren't lost, and connected it to the frontend with async fetch() and CORS
- Applied least-privilege IAM roles and a \$0.01 zero-spend budget alert, keeping the whole stack within the AWS Free Tier

Responder Ready — Capstone Project

Jan 2026 – May 2026

Full-Stack Web App – HTML, CSS, JS, MySQL, Node.js, Express

- Engineered a dynamic CMS using PDF2JSON, allowing admins to upload PDFs that auto-parse into interactive, slide-based learning modules.
- Architected and optimized MySQL schemas, redesigning core tables to improve data integrity and support scalable user-progress tracking.
- Built a secure password-recovery system via Brevo API for automated email delivery, ensuring reliable authentication and account security.
- Integrated RESTful APIs for privacy-compliant real-time data handling; modernized Admin Dashboard UI with Bootstrap + custom CSS3.
- Served as Scrum Master, running sprints, prioritizing the backlog, and leading stand-ups to keep the team following Agile principles throughout development.

Family Business Inventory & Revenue Dashboard

2023

Personal Project — Power BI

- Built a Power BI dashboard analyzing inventory and revenue data for a family-owned retail business, comparing performance across rolling 6-month periods to surface trends.
- Designed visualizations to track revenue growth/decline period-over-period, highlighting seasonal patterns and informing inventory and purchasing decisions.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Bash, SQL, HTML / CSS

Back-End & APIs: Node.js, Express, RESTful APIs, Postman

Databases: MySQL, MariaDB, MongoDB

Cloud & DevOps: AWS (S3, CloudFront, Lambda, API Gateway, DynamoDB, IAM), GCP, Docker, Terraform, CI/CD, GitHub Actions, Linux

Data & Visualization: Power BI, Excel, Data Analysis, Trend Analysis

Testing & Version Control: Git, GitHub, Unit Testing, Debugging, Root Cause Analysis

Security (SOC): SIEM (Splunk, Elastic Stack), Wireshark, Incident Response, Alert Triage, Threat Intelligence, Phishing Analysis

SOFT SKILLS

Teamwork, Communication, Critical Thinking, Problem Solving, Time Management, Multitasking

EDUCATION

B.S. Computer Science — Concentration in Cybersecurity

Aug 2022 – May 2026

Tennessee Technological University · Cookeville, TN · GPA: 3.63 / 4.0

CERTIFICATIONS

- AWS Cloud Solutions Architect Specialization — Coursera (October 2026)
- Professional Cloud Data Engineer — Google Cloud (2026)
- SOC Level 1 Analyst — TryHackMe (Jul 2026)
