SUMMARY

Computer Science graduate and DevOps Engineer with hands-on experience building and automating scalable, secure software systems. Skilled in Python, JavaScript, and C++, with a strong foundation in data structures, REST APIs, databases, and cloud infrastructure. Brings a security-first mindset to software development, currently expanding cloud expertise through an AWS certification in progress, and is eager to apply strong problem-solving skills to build end-to-end technology solutions in a collaborative, Agile environment.

WORK EXPERIENCE

DevOps Engineer Intern

May 2026 – August 2026

SkyIT Services · Remote

- Automating CI/CD pipelines using GitHub Actions and Docker, reducing manual deployment effort and accelerating release cycles.
- Using Terraform to build and deploy servers, enabling repeatable, version-controlled infrastructure provisioning across environments.
- Managing scalable cloud infrastructure, ensuring high availability and cost efficiency.
- Monitoring system performance, diagnosing and resolving incidents through root cause analysis, and documenting infrastructure runbooks for the team.

Store Associate

Aug 2021 – May 2022

Family Liquor Store

- Assisted customers with product selection and inquiries, delivering friendly and efficient service.
- Restocked shelves and organized inventory to maintain a clean, well-stocked sales floor.
- Operated cash registers and managed transactions accurately, handling cash and card payments.

PROJECTS

Responder Ready — Capstone Project

Jan 2026

Full-Stack Web App

- Engineered a dynamic CMS using PDF2JSON, allowing admins to upload PDFs that auto-parse into interactive, slide-based learning modules.
- Architected and optimized MySQL schemas, redesigning core tables to improve data integrity and support scalable user-progress tracking.
- Built a secure password-recovery system via Brevo API for automated email delivery, ensuring reliable authentication and account security.
- Integrated RESTful APIs for privacy-compliant real-time data handling; modernized Admin Dashboard UI with Bootstrap + custom CSS3.
- Served as Scrum Master, running sprints, prioritizing the backlog, and leading stand-ups to keep the team following Agile principles throughout development.

Course Management Dashboard

May 2025

- Led front-end development (HTML, CSS, JS, Bootstrap) delivering a responsive, accessible dashboard for professor-student course interactions.
- Contributed to a Node.js / Express / MariaDB back-end enabling course creation, student enrollment, and feedback management, following version-controlled, code-reviewed workflows with a team of 4 engineers.
- Implemented robust email/password validation for secure login across a cross-functional team of 4 engineers.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Bash, SQL, HTML / CSS

Back-End & APIs: Node.js, Express, RESTful APIs, Postman

Databases: MySQL, MariaDB, MongoDB

Cloud & DevOps: AWS (in progress), GCP, Docker, Terraform, CI/CD, GitHub Actions, Linux

Testing & Version Control: Git, GitHub, Unit Testing, Debugging, Root Cause Analysis

Security (SOC): SIEM (Splunk, Elastic Stack), Wireshark, Incident Response, Alert Triage, Threat Intelligence, Phishing Analysis

SOFT SKILLS

Teamwork, Communication, Critical Thinking, Problem Solving, Time Management, Multitasking

EDUCATION

B.S. Computer Science — Concentration in Cybersecurity

Aug 2022 – May 2026

Tennessee Technological University · Cookeville, TN · GPA: 3.63 / 4.0

CERTIFICATIONS

- AWS Cloud Solutions Architect Specialization — In Progress (Coursera)
- Professional Cloud Data Engineer — Google Cloud (2026)
- SOC Level 1 Analyst — TryHackMe (Jul 2026)
- Foundations of Git — GitKraken (Sep 2023)
- DevOps Foundations — LinkedIn Learning (Oct 2023)
